

ISO 9001 : 2015 Certified

JAVA

Introduction to Java programming

1. Execution of C Program
2. History
3. Structure of C Program

Variables and Keywords

1. The Java Virtual Machine
2. Variables and data types
3. Conditional and looping constructs
4. Arrays

Object-oriented programming with Java Classes and Objects

1. Fields and Methods
2. Constructors
3. Overloading methods
4. Garbage collection
5. Nested classes

Inheritance

1. Overriding methods
2. Polymorphism
3. Making methods and classes final
4. Abstract classes and methods
5. Interfaces

Exception handling with try-throw-catch-finally constructs

1. The Exception class

The Object class

1. Cloning objects
2. The JDK LinkedList class
3. Strings
4. String conversions

Working with types: Wrapper classes

1. Enumeration interface

Packages

1. Package access
2. Documentation comments

Applets

Website: - www.shimpyinfotech.com; info@shimpyinfotech.com

Email: shimpyinfotech@gmail.com; sshimpy.srivastava@gmail.com

Address: - Plot No. 36, Harbans Nagar, Meerut Road; Ghaziabad (201002)

1. Configuring applets
2. Applet capabilities and restrictions

Basics of AWT and Swing

1. Layout Managers
2. Event Handling
3. The Action Listener interface
4. Panels
5. Classes for various controls, such as label, choice, list,
6. Checkbox, etc.
7. Dialogs and frames
8. Using menus
9. Using the adapter classes
10. Graphics

Threads

1. Synchronization

The I/O Package

1. InputStream and OutputStream classes
2. Reader and Writer classes

Basic concepts of networking

1. Working with URLs
2. Concepts of URLs
3. Sockets

Database connectivity with JDBC

1. Java security

Database connectivity with JDBC

1. Java security

Advanced Java Programming (J2EE) - (Web-Server & support Technologies)

Java Database Connectivity

1. JDBC Product
2. Types of Drivers
3. Two-Tier Client/Server Model
4. Three-Tier Client/Sever Model
5. Basic Steps of JDBC
6. Creating and Executing SQL Statement
7. The Result Set Object
8. Working with Database MetaData
9. Interface

Servlets

Website: - www.shimpyinfotech.com; info@shimpyinfotech.com

Email: shimpyinfotech@gmail.com; sshimpy.srivastava@gmail.com

Address: - Plot No. 36, Harbans Nagar, Meerut Road; Ghaziabad (201002)

1. Servlet Interaction & Advanced Servlets
2. Life cycle of Servlet
3. Java Servlet Development Kit
4. Javax.servlet package
5. Reading Servlet Parameters
6. Reading Initialization Parameters
7. The javax.servlet.http Package
8. Handling HTTP

JavaServer Pages

1. JSP Technologies
2. Understanding the Client-Server Model
3. Understanding Web server software
4. Configuring the JSP Server
5. Handling JSP Errors
6. JSP Translation Time Errors
7. JSP Request Time Errors
8. Creating a JSP Error Page

RMI

1. RMI Architecture
2. Designing RMI application
3. Executing RMI application
4. Types of EnterpriseJava beans
5. Session Bean & Entity Bean
6. Features of Session Bean
7. Life-cycle of Stateful Seession Bean
8. Features of Entity Bean
9. Life-cycle of Entity Bean
10. Container-managed Transactions
11. Bean-managed Transactions
12. Implementing a container-manged Entity Bean

XML

1. What is XML?
2. XML Syntax Rules

Struts

1. Introduction to the Apache Struts
2. MVC Architecture
3. Struts Architecture
4. How Struts Works?
5. Introduction to the Struts Controller
6. Introduction to the Struts Action Class
7. Using Struts ActionFrom Class
8. Using Struts HTML Tags
9. Introduction to Struts Validator Framework
10. Client Side Address Validation in Struts
11. Custom Validators Example
12. Developing Application with Struts Tiles

Email: shimpyinfotech@gmail.com; sshimpy.srivastava@gmail.com

Address: - Plot No. 36, Harbans Nagar, Meerut Road; Ghaziabad (201002)

Hibernate

1. Introduction to Hibernate 3.0
2. Hibernate Architecture
3. First Hibernate Application

Thus, if you are looking for JAVA training classes, just contact us at info@shimpyinfotech.com to experience the best PHP training modules.
